CubelQ Announces the Availability of three (3) new Cheque Scanner Models

[EN] Athens, GR, April 8th, 2010 - CubelQ Limited, an IT company provider of software solutions and systems for financial, banking and corporate institutions, today announces the availability three (3) new cheque scanner models.

LS150-VE

LS150-UV

LS150 model is evolving in a product family. **LS150-VE** (VE: Value Edition) and **LS150-UV** (UV: Ultra-Violet) represent the best value proposition on the market today. The new LS150-VE shares the same mechanical structure with LS150, but has streamlined electronics and a simplified input feeder. The new LS150-UV is the evolution that adds more security to cheque scanning through Ultra-Violet light document reading and security detection. Both models based on the solid mechanical design of LS150, guarantee of robustness and durability combined in a sleek and compact shape make the LS150 family champion in price/performance.

LS515-SE

The new **LS515-SE** (SE: Second Edition) is the heavy-duty, feature-rich scanner for bulk check and document processing. LS515-SE is the ideal device for high volume branches, regional processing centers and volume back office applications. Proven reliability, intelligent sorting and a high throughput, up to 120 dpm, with real life documents make LS515-SE the right choice for your mission-critical operations. Supplied with a full range of services and software support, it is suitable for processing a wide range of cheque and value paper formats. As second edition of our top selling high-end scanner, this new enhanced version has improved features combined with a very competitive price.
