News Release

CubeIQ Announces the Licensing of Paragon's ATMulator Plus™ to Attica Bank

[EN] Athens, GR, July 17th, 2012 - CubeIQ Limited, an IT company provider of software solutions and systems for financial, banking and corporate institutions, announces the licensing of Paragon's ATMulator Plus™ to Attica Bank.

The customer, **Attica Bank SA**, operates as Banking Company SA, according to the provisions of Law 2190/20, on incorporated companies, as currently in effect, the provisions of Law 2076/92 on Financial Institutions and other relevant legislative provisions. Attica Bank was founded in 1925 (February 5, 1925) and is today a dynamic financial institution in Greece that has a growing network composed, this time from 80 branches. Banks main shareholders are: (a) TSMEDE (The Pension Fund of the Engineers and Public Works Contractors) with 42.87% of shares, (b) The TT Hellenic Postbank with 22.43% of shares and (c) The Loans and Consignations Fund (LCF) with 19.28% of shares

ATMs are an important electronic banking channel and a branding tool offering targeted marketing messages and specialized services. Creating and testing ATM configurations to take advantage of state-of-the-industry services can be challenging. **ATMulator Plus™** is a Windows®-based graphical development and testing tool combining ATM simulation with the powerful "load file" configuration abilities of **ConfigBuilder™** to develop ATM configurations and perform the entire transaction flow.

Attica Bank is using ATMulatorPlus™ to improve QA testing efficiency and to reduce testing cost and time to market for new ATM features and marketing campaigns. The software is easy to use and allows users to reproduce test cases that are hard to generate in a real ATM, like device faults. ATMulatorPlus™ also is especially helpful as it allows testers to execute test cases in minutes, rather than days. The extensive logging facilities of ATMulatorPlus™ help to produce testing documentation easily and keep test records for future reference and audit.
