

News Release

CubelQ Announces Partnership with **Securosys™**

[EN] Athens, GR, **December 3rd, 2020** - **CubelQ Limited**, an IT company provider of software solutions and systems for financial, banking and corporate institutions, announces partnership with **Securosys™**.

Securosys™ is a Swiss company designing and producing hardware and software cryptographic systems that secure the digital infrastructure. **Securosys Primus Hardware Security Modules (HSM)** secure digital keys used in relation with banking transactions, identity and access management, digital signature, key management, and much more. Combined with the **Transaction Security Broker** it allows to build systems based on multi-authorization that will match the highest enterprise standards for security, compliance and flexibility. In addition, the **Imunes Trusted Execution Environment (TEE)** allows for secure execution of programs like policy engines, whitelisting services, etc. The Securosys portfolio is complemented with the **Centurion Network Encryptors** that secure point-to-point and multi-point layer-2 and layer-3 networks.

Securosys products are developed and manufactured in Switzerland and with vested European partners using a trusted supply chain. Securosys Primus HSM protect over \$100B in daily transactions on the Swiss Banking system SIC operated by SIX under the supervision of the Swiss National Bank (SNB). **Securosys – Be Digital. Be Secure.**

CubelQ partnered with **Securosys™** to combine leading **Data Security and Cryptographic** technology with CubelQ's Data Security and Authentication technology and know-how. **CubelQ** is an official reseller/partner for **Securosys™** in East and South East Europe.

About Securosys™

Securosys SA is a technology company headquartered in Zurich, Switzerland. We secure data and communications. Our products are developed and manufactured in Switzerland and with vested European partners using a trusted supply chain. There are no backdoors. Our flagship product is the Primus Hardware Security Module applicable to for all applications where

sensitive data are transferred or stored; it is used to protect the **Swiss banking system SIC**, Blockchain and crypto assets solutions, Public Key Infrastructure Systems and other Fintech-based applications. More information at www.secuosys.ch
